PROFESSIONAL SUMMARY

Creative and proactive software developer with a full-stack mindset and practical experience building functional web platforms. I thrive in dynamic environments and am passionate about turning ideas into functional systems. I'm looking to join a team that values autonomy, collaboration, and continuous learning, where I can develop my technology skills and grow professionally.

EXPERIENCE

FULL STACK DEVELOPER

JFK the American School of Queretaro

January 2025 - Present

- Developed and maintained key features for a scalable web platform serving 1,500+ active users, improving user experience and system usability.
- Optimized server infrastructure through Apache migration, improving response times by 40% and increasing platform stability.
- Automated deployment workflows using GitHub Actions, reducing configuration errors by 60% and accelerating CI/CD processes.
- Collaborated within Agile Scrum teams, participating in code reviews, sprint planning, and implementation of software engineering best practices.

EDUCATION

UCQ (Universidad Cuauhtemoc Querétaro)

September 2022 - July 2025

Software and Computer Systems Engineering
